

Technical Data Sheet

DOWSILTM 781 Acetoxy Sealant

Medium/high modulus acetoxy silicone sealant

APPLICATIONS

DOWSILTM 781 Acetoxy Sealant is a one-part, silicone sealant which has good adhesion to a range of non-porous surfaces including glass, aluminum, painted surfaces and composite boards. It offers excellent resistance to aging, shrinkage, cracking and discoloring. It is also approved in certain countries for use in contact with potable water once cured.

TYPICAL PROPERTIES

Specification Writers: These values are not intended for use in preparing specifications.

Property	Unit	Result
Cure system		Acetoxy
Application temperature	°C	+5 to +40
	°F	+41 to +104
Specific gravity		1.02
Extrusion rate	g/minute	220
Skin-over time (23°C (73°F), 50% R.H.)	minutes	14
Cure rate (23°C (73°F), 50% R.H.)		
1 day	mm	3
3 days	mm	5
2 mm thickness S2 dumb-bells (ISO** 37)	
E-Modulus 100%	MPa	0.40
Tensile strength	MPa	1.8
Elongation at break	%	520
12x12x50 mm size T.A. joint (ISO 8339/I	DIN ³ 2-8339)	
E-Modulus 100%	MPa	0.4
E-Modulus 60%	MPa	0.35
Tensile strength	MPa	0.59
Elongation at break	%	190
Hardness (Shore A)		22
Joint movement capability	%	20

 CTM: Corporate Test Method, copies of CTMs are available on request. ISO: International Standardisation Organisation. DIN: Deutsche Industrie Norm.

FEATURES

- High strength
- Good elasticity
- Conforms to ISO 11600-F&G-20LM
- Resistant to ozone, ultra-violet radiation and temperature extremes

TECHNICAL SPECIFICATIONS AND STANDARDS

Conforms to ISO 11600-F&G-20LM. UK Water Regulations Advisory Scheme (WRAS)-approved Material.

HOW TO USE

Surface Preparation

Ensure that surfaces to be sealed are clean, dry, sound and free from frost, release agents, old sealants and other contaminants which could impair adhesion.

All surfaces should be cleaned and degreased by wiping with a suitable solvent such as DOWSILTM R-40 Universal Cleaner on a clean oil- and lint-free cloth before application of sealant.

Note: When using any solvent, always provide adequate ventilation. Avoid heat, sparks and open flames. Use solvent resistant gloves. Observe and follow all precautions listed on solvent container label.

Masking

Areas adjacent to the joints should be masked with tape to prevent contamination of the substrates and to ensure a neat sealant line. Masking tape should be removed immediately after tooling.

Priming

All joint surfaces other than glass and glazed ceramics should be primed. For specific advice, contact one of the regional service centers for technical assistance.

Back-Up Materials

When back-up material is required, a closed cell polyethylene backer rod is recommended. Low tack polyethylene tape should be used in joints too shallow to allow the use of a backer rod. Back-up materials provide back pressure and prevent three sided adhesion that limits sealant movement capability.

Finishing

The joint should be tooled within 5 minutes of application to ensure good contact between the sealant and the substrate. Tooling of the sealant also gives a smooth, professional finish

Clean-Up

Excess sealant may be cleaned off tools and non-porous surfaces whilst in an uncured state using DOWSIL R-40 Universal Cleaner. If sealant is misapplied to porous substrates, it should be left until it is just cured and then removed by peeling, cutting or other mechanical means. Care should be taken not to damage plastic or coated surfaces.

Joint Design

The sealant joint width should be designed to accommodate the movement capability of the sealant. When designing joints using DOWSIL 781 Acetoxy Sealant, the minimum width should be 6 mm. For joints between 6-12 mm wide, a seal depth of 6 mm is required. For joints above 12 mm wide, a width to depth ratio of 2:1 should be used. In situations where fillet joints are needed, a minimum of 6 mm sealant bite to each substrate is recommended. For joint dimensions greater than 25 mm, please contact one of the regional service centers for technical assistance.

HANDLING **PRECAUTIONS PRODUCT SAFETY INFORMATION REOUIRED FOR** SAFE USE IS NOT INCLUDED IN THIS DOCUMENT. BEFORE HANDLING, READ PRODUCT AND SAFETY DATA SHEETS AND CONTAINER LABELS FOR SAFE USE, PHYSICAL AND **HEALTH HAZARD INFORMATION. THE SAFETY** DATA SHEET IS AVAILABLE ON THE DOW WEBSITE AT WWW.CONSUMER.DOW.COM. **OR FROM YOUR DOW SALES APPLICATION ENGINEER, OR DISTRIBUTOR. OR BY CALLING DOW CUSTOMER SERVICE.**

STORAGE

Product should be stored at or below 30°C (86°F) in original, unopened containers.

PACKAGING INFORMATION

DOWSIL 781 Acetoxy Sealant is supplied in 310 ml cartridges packed in boxes of 12.

UNRESTRICTED – May be shared with anyone [®]TMTrademark of The Dow Chemical Company ("Dow") or an affiliated company of Dow DOWSILTM 781 Acetoxy Sealant © 2017 The Dow Chemical Company. All rights reserved.

LIMITATIONS

DOWSIL 781 Acetoxy Sealant is not recommended for use on porous substrates such as concrete, stone, marble or granite. DOWSIL 781 Acetoxy Sealant should not be used in contact with the edge seal of an insulated glazing unit

Do not use DOWSIL 781 Acetoxy Sealant on bituminous substrates, substrates based on natural rubber, choloroprene or EPDM, or on building materials and flexible plastics which might bleed oils, plasticizers, or solvents. Do not use DOWSIL 781 Acetoxy Sealant in a totally confined space because the sealant requires atmospheric moisture to cure. Because acetic acid is released during curing, it can corrode mirror silver and sensitive metals such as copper, brass and lead. DOWSIL 781 Acetoxy Sealant is not recommended for use on submerged joints, or in joints where physical abuse or abrasion is likely to occur.

DOWSIL 781 Acetoxy Sealant is not suitable for food contact applications. However, it has been listed by the UK Water Fittings Byelaws Scheme for use in contact with potable water, once cured.

DOWSIL 781 Acetoxy Sealant has not been designed for use as an aquarium sealant.

DOWSIL 781 Acetoxy Sealant is not recommended for structural glazing or insulated glazing applications.

DOWSIL 781 Acetoxy Sealant is not recommended for structural glazing or insulated glazing applications.

This product is neither tested nor represented as suitable for medical or pharmaceutical uses.

HEALTH AND ENVIRONMENTAL INFORMATION

To support customers in their product safety needs, Dow has an extensive

Product Stewardship organization and a team of product safety and regulatory compliance specialists available in each area.

For further information, please see our website, www.consumer.dow.com or consult your local Dow representative.

LIMITED WARRANTY INFORMATION – PLEASE READ CAREFULLY

The information contained herein is offered in good faith and is believed to be accurate. However, because conditions and methods of use of our products are beyond our control, this information should not be used in substitution for customer's tests to ensure that our products are safe, effective, and fully satisfactory for the intended end use. Suggestions of use shall not be taken as inducements to infringe any patent.

Dow's sole warranty is that our products will meet the sales specifications in effect at the time of shipment.

Your exclusive remedy for breach of such warranty is limited to refund of purchase price or replacement of any product shown to be other than as warranted.

TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, DOW SPECIFICALLY DISCLAIMS ANY OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE OR MERCHANTABILITY.
