

Bio Boost

Biological Septic Tank Additive

Bio Boost - easily one of the most effective Septic Tank Additives available.

Proven to remove odours, crusting and smells - Bio Boost will even biologically degrade waste paper in 4-5 days.

KEY PROPERTIES

Bio Boost is a blend of safe to use bacteria selected to be efficient at degrading the contents of a Septic Tank.

Bio Boost maintains Septic Tanks in a liquid state and significantly reduces crusting – a major cause of malodours.

- Biological
- Solid Crust Preventative
- Hazard label free

APPLICATION

For first fill or immediately after cleaning/emptying, apply 0.3L of Bio Boost directly to the toilet bowl and flush.

Maintain on a monthly basis by applying 100ml of Bio Boost to the toilet bowl (application based upon a family of 4).

If malodours re-occur, re-dose at the 0.3L application level.

NB. Septic Tank microbial activity can be impaired by the use of bleach or acidic based cleaning agents – we recommend the use of Bio Clean and Bio TCD cleaning chemicals.

TECHNICAL DATA

Appearance	Blue Liquid	SG	1.05
pH	8.5	Bacterial Count	> 1.0 × 10 ⁷ cfu/ml

PACKAGING

1L bottles

SAFE HANDLING AND STORAGE

Store in original containers off the ground and out of direct sunlight. Avoid extremes of temperature.

Shelf life: 2 years from Date of Manufacture.

For guidance on handling and disposal see Material Safety Data Sheet.
